

## Auto Accident Claim Management: Get Paid More While Reducing Compliance Risk

Continuum understands that your hospital is busy, working diligently to capture revenue, enhance the patient experience and, of course, safeguard against compliance risk. But the management and collection of auto claims are large pain points for many hospitals as they handle write-offs, slow payment, lack of staff productivity and excessive A/R days.

Continuum is focused on getting your hospital paid more on every auto accident claim processed. Our technology is patient-centered and focused on creating continuity of care for accident victims as well as increasing reimbursements and recoveries for hospitals, physician groups and health systems for no-fault and liability accident claims. In fact, our proven solution has not only led to the settling of thousands of claims but also has a success rate of 98 percent.

Continuum assists hospitals with securing millions of dollars in MVA revenue each year

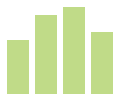

## Maximum Revenue Collection: Specialized Approach

When you begin your search for revenue cycle management companies, one thing is clear: The majority of companies are doing much more than third-party liability auto billing, management and collections. In contrast, Continuum is a specialist in this area. In fact, it's all we do.

Continuum offers a comprehensive billing solution for motor vehicle accidents that simplifies and streamlines the management of accident claims. Our system is so effective that each year we assist hospitals with settling tens of thousands of auto claims, translating into millions of dollars captured that were previously uncollected revenue. But that's not all that sets us apart.

## Why Select Continuum for Your Motor Vehicle Claims?

Standard EMR services are not built to properly process, track and manage auto accident claims. But Continuum technology is. With Continuum's proprietary technology, we manage and collect on your auto accident claims so you don't have to. Other benefits include:

### Transparent Reporting

Continuum has discovered the most effective key performance indicators in the auto claims industry and provides you with this full range of reporting indicators. You can accurately track every detail of accident claims with reports that are not only impactful but also fully customizable to your needs.

### Reduced Compliance Risk

Lawsuits from improper billing and management of auto claims are on the rise. Continuum's proven solution ensures proper coordination of benefits and compliance between auto no-fault and liability payers — protecting you from legal action.

### Excellent Training

Continuum partners with your staff to make sure they are adequately trained on the registration side, maximizing your investment and ensuring accurate and efficient usage.

### Patient Focus

Continuum doesn't just promise that your patients will be happy. We take it a step further — and measure their satisfaction. Recent surveys show that 99% of Continuum patients reported high satisfaction levels during an otherwise stressful and chaotic time.
